SPECTRUM ... BE THE CHANGE ...

Exploring Science

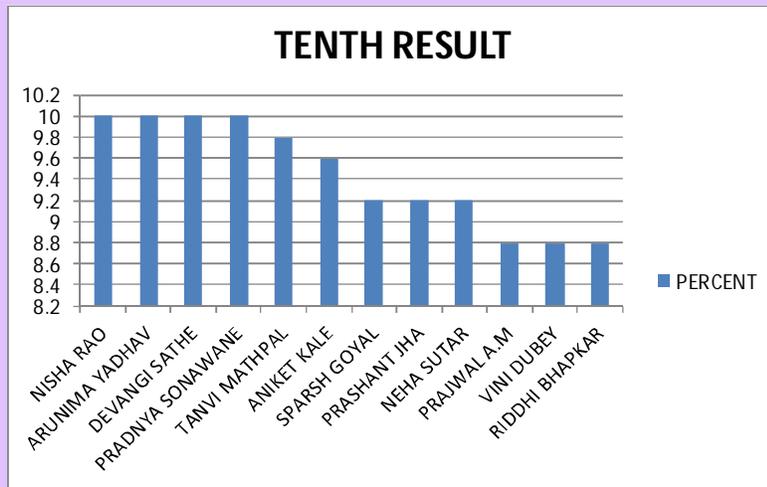

Pre-primary education is an important stage which lays the foundation for life-long learning and is responsible for the development of a person and serves as an opening point of formal education. A child's learning and development are mainly influenced by family, school and society. Children are active learners who are curious and interested in exploration. Children are born curious and want to know all about their environment. Children explore the world with their senses. They see, touch, smell, hear, and taste. As children learn to crawl, to stand, and to walk, they are free to discover more on their own and learn to think for themselves. Young children begin to construct many concepts during the pre-primary period, including mathematics and science concepts. They also develop the processes that enables them to apply their newly acquired concepts. They try to expand existing concepts and develop new ones. As they enter the school they apply their basic concepts and try to build up the new concepts taught in the school which later on help them to understand more complex concepts when they grow up. They begin to learn about new shapes and sizes. They see, feel the different sizes. They grab the things and find that some do not fit in their tiny hands. Their exploration continues. They start observing, start relating new things with the basic concepts they are aware of. Example : The safety habits which they are taught at school, they start implementing at home or outside or personal hygiene like brushing teeth twice a day or good eating habits. Children start exploring their surroundings and start building their knowledge. They start building their concepts by closely observing the environment. Natural science such as wind, rain, flowers, animals birds etc. which children come across in their everyday life are the topics of natural science. These interesting science topics are excellent learning material for children. Children put on a deeper and better understanding of the things around them. They take pleasure in learning science, through observation, exploration, questioning etc. Many modern technologies such as Computers, Television which are easily available to the children are applications of science in everyday life. Development of attitudes towards science starts at the early stages of life. Exposure to scientific phenomena at an early age leads to better understanding of the scientific concepts studied later in a formal way.

Pre Primary Supervisor

Young Achievers of c.i.s Aundh

Grade X students and teachers of City International School, Aundh have done their school proud by securing good results. For the 5th consecutive year, our school shines out with a 100% result and most of the students got good grades. The teachers dedicating extra time for remediation and the children who tirelessly worked with them has to be appreciated at this point. Burning the mid-night oil has paid off with bounds of joy. The management, teachers and students always shared the belief 'To be prepared is half the victory' and that is what they always focused and relied on, the hard work and endless pursuit of perfection had to blossom into something as magnificent as this. The school is proud and privileged to have students who are ready to work their way out and not in search of shortcuts because the preparation cannot be categorized in a year's work, it started from the very inception, when the teachers hand held the students to make them write and read. The fruits take time to bear but they do so nonetheless. The sincere efforts of the students and their families have been remarkable. The school will continue to set new benchmarks but more importantly the development of a child as a healthy and responsible individual is more vital to the school and is irreplaceable.

FAREWELL PARTY

Farewell party is a very special occasion for every student of std-X. This is the day when they leave their school and pursue further studies. All the students of std -IX organized a farewell party for students of std-X. The farewell party was organized on 25th march 2015. The assembly hall was decorated and lunch was arranged for everyone. The students of Std-X presented wonderful dance performances. 'Miss CIS' and 'Master CIS' Contest was held for students of std-X. Here the students were asked some rapid fire question and were ranked accordingly. At the end the winners were awarded. Some students of class X shared their experiences and thanked all the teachers. The students of class X were given souvenir by the school as the blessing. All in all the function was a wonderful and heart touching event.

WORLD ENVIRONMENT DAY

It's World Environment Day .We have been celebrating this day on June 5 every year. Industrialisation and urbanization over the year have degraded natural resources of this planet. In our quest for modernization, we have unknowingly disturbed the ecological balance. we need to conserve the environment as it is our social responsibility. One of the most creative ways to solve environment problems is to minimize consumption .Simple things like replacing bulbs with compact fluorescent bulbs, turning off lights and appliances including fans, computers when they are not in use. Many products are recyclable like waste from our kitchen ,grass clippings etc. which can be converted into excellent manure.

World Environment Day is celebrated around the world in many ways. In my city, Pune awareness was created through street plays, bicycle parades ,clean-up campaigns and tree planting. We,as student can take small step to save our environment. Our little efforts can do great things. It is our duty as human beings to conserve our nature.

Akashay Gaikwad 7 A

First Day of the school

After a long summer vacation ,our school started on 15th June, Monday. Definitely ,the day was very exciting as all new and old friends met after a long break. Everyone was eager to share their vacation experiences. We were all looking smart in our new uniform. The full school building was painted, every thing seemed to be very beautiful around.

It was raining outside, so we came with our new umbrellas and raincoats. The staff is also very kind and cooperative. The day went off very well. Definitely, everyone waited for break but at the same time we all were happy that our school started.

ZERO SHADOW DAY IN PUNE

It's said that your shadow is your most faithful companion. It never leaves your side.

Pune witnessed days when shadow was not companion, this phenomenon is known as 'zero shadow day'. An astronomical event, it comes twice a year and for a few moments, one's shadow falls directly below his or her feet and would seem to vanish.

It occurs due to the northward and southward motion of the sun and when it is positioned at 23 1/2 degree altitude, the sun's rays appear exactly overhead around noon." The event occurs annually, 13th and 14th May, 2015 were the days in Pune to witness this event, since it was summer. The effect of the zero shadow was witnessed in the city at exactly 12.31 p.m. on these dates.

"A similar situation will arise on July 30th 2015 when sun travels backward from south to north, re-tracing its rays. However, it will be monsoon here in Pune at that time and hence; we may not be able to witness it."

CELA RESULT 2014-15

English is an international language which is used officially all over the world. So learning English language has become necessity for students who want to achieve success and want to go to foreign destinations for higher studies or job purposes. To meet the demands of learning English language, CELA (Cambridge English Language Assessment) was introduced by British Council in City International School, Aundh. 52 students (learners) from City International School, Aundh appeared for different levels. Under these exams, different skills of learners assessed. **These exams were YLE for young learners (for class I-IV) KET (for class V), PET (for classes VI and VII) and FCE (Cambridge English First) that was aimed for school pupils who want to assess their English for professional and study purposes.** All the students appeared for CELA exams in the month of November and December 2014. All the learners cleared their exams and some of them passed with flying colours. The exams also gave confidence, language skills to travel internationally and command over written as well as spoken English for work and study purposes.

Electricity consumption

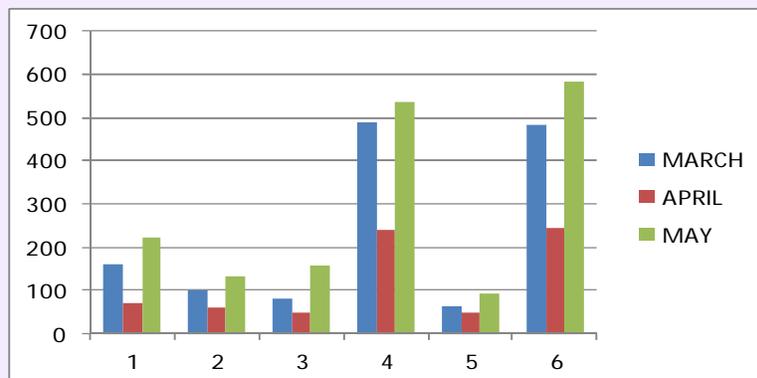

We are implementing the policy of save electricity in the school from last year.

We are using the various techniques to save the electricity and the graph shows the result.

Steps to reduce the electricity consumption:-

1. Use less hot water.
2. Switch off appliances when not in use.
3. Install efficient lighting measure and monitor electricity consumption and costs.

Electricity Consumption Graph:

WORLD EARTH DAY

Growing eco-activism before Earth Day 1970

In 1968, Morton Hilbert and the U.S public health services organized the Human Ecology Symposium, an environmental conference for students to hear from scientists about the effect of environmental degradation on human health. This was the beginning of Earth Day. For the next two years, Morton Hilbert and students worked to plan the first Earth Day. In April 1970 along with a federal proclamation from U.S Sen. Gaylord Nelson-the first Earth Day was held.

Earth day is an annual event, celebrated on April 22. On this day worldwide events are held to demonstrate the support for environmental protection. It was first celebrated in 1970, and is now coordinated globally by the Earth Day Network, and celebrated in more than 192 countries each year.

School activity

At our school , CITY INTERNATIONAL SCHOOL,AUNDH students were informed about the importance of World's Earth Day. A poster making competition was organized for students of classes (I-IX)

Amrat Ramnani 8 B

Each year, World Earth Day is celebrated on the 22nd of April . In our school we also celebrated World Earth Day . On that day we made many creative and colourful posters . It was an initiative demonstrate support taken towards environmental protection . It was first celebrated in 1970 and now celebrated in more than 192 countries every year . The world earth day is celebrated in order to keep our planet healthy and clean . World earth day is celebrated to create an awareness among the people . The world now marks the earth day to make the human race realise ,the importance of mother earth . We have forgotten that earth is our home and we have to keep it clean and protect it in order to stay healthy and alive . So on this earth day let us pledge to do whatever we can for our planet and help to save earth, save life, save environment and make this a better place to live in .

The Best Ways To Enjoy The World Earth Day

Learn more about the environment.

Join an environment group.

Educate your family members about the earth day.

THE TIMES OF INDIA

PUNE SCHOOL NATIONAL CURRICULUM RANKING 2014

Source : Times School Survey 2014

Students Council election 2015-2016

Every year school elects Head Girl and Head Boy to develop the leadership qualities in students, as well as to develop the relationship between secondary and primary students. By this process they will come to know electoral system and which will be helpful in future.

For year 2015-16 election was held in the month of April. Manisha mam, Amita Mam and Mahesh Sir conducted the election in the presence of Principal Mam. The students who were interested to come up as nominees for head boy and head girl introduced themselves by giving a short speech. The students voting takes place. We counted the votes and afterwards Principal Madam declared the result for year 2015 ANISHA AHERRAO is elected as Head Girl & SHIVAM SINGH is elected as Head boy. Of City International School, Aundh.

Best Of Luck to them.

A MEMORABLE VISIT TO 'SINDHU TAI SAPKAL'

One fine afternoon of 24th April, around 2:30 p.m. we all left for a memorable visit to "Sanmati Baal Nketan" which is situated in 'Hadapsar' a few kilometers away from our school. This God blessed Baal Nketan is run by 'SINDHU TAI SAPKAL'.

Sindhu Tai Sapkal has devoted her entire life for the homeless children, hence she is fondly called 'MAI' {mother}. She is mother of many homeless children who themselves today are parents and are well educated. Though she is not being financially supported by Indian government, her hopes & determination towards her work didn't decrease. She started giving speeches & with that money she helped educate the orphans. Her personal life was tough but she was a strong woman who faced all the obstacles that came in her way. The experiences that she shared with us are inspiring and has made us all to look at life with more positivity. Her sacrifices for others and her personal life experiences left us in tears.

What we learnt is that whatever, the situation may be never lose hope, work for a better tomorrow. When we reached there we were excited to meet the inmates as well as 'Mai'. We spent a memorable day with the inmates & enjoyed a lot. We gifted them with some goodies which would make them happy. Our school donated ceiling fans and took some yummy snacks for them. Everyone felt pleasant and enjoyed the atmosphere.

This was a great inspiration and a lifelong experience which we got because of our school.

Soundarya Nagarkar 8th B

CLUB aCtivities

GREEN CLUB

5th June is observed as **World Environment Day**. It is organized by the United Nations Environment Programme(UNEP).

Now-a-days experts have raised issue to create awareness an measures to be taken to protect nature, to follow it Green Club conducted an activity of writing slogans on awareness on Environment issues.

Teachers enthusiastically participated in this activity and came up with new ideas which shown their awareness about environment.

This shows that nations and people enjoy a safer and more prosperous future and World Environment Day is a peoples event with colourful activities such as street rallies, bicycle parades, green concerts, essay slogans and poster competitions in schools, tree planting as well as recycling and clean up campaigns.

traffic cLUB actiVity

The traffic patrolling club teachers delivered the lecture on the three types of signs to be followed. There are mainly three types of signs viz. **Cautionary signs, Mandatory signs and Informatory signs**.

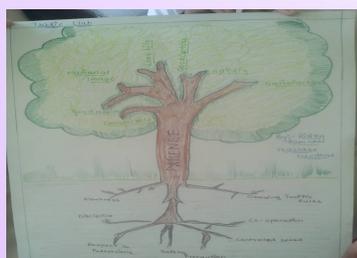

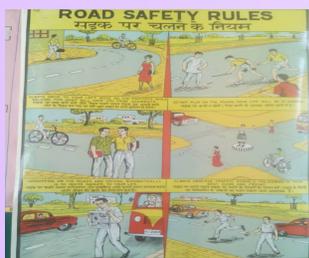

Cautionary signs are meant to caution the driver about the hazards or situations lying ahead on the road. They are triangular in shape with Red border.

Mandatory signs are meant obligatory on the traffic which uses a specific area of the road.

They are generally round in shape with Red border. Some of them are Blue in colour. “Stop” and “Give Way “ are octagon and triangular in shape.

Informatory signs are meant to provide information on direction, destination, road side facilities etc. to the road user. These signs are generally facilitators to the driver and signs are normally Blue in colour. The sign may have direction arrow and also the distance of facility from the sign.

On the basis of this lecture, students prepared charts displaying various signs and symbols. The lecture proved beneficial for the students of standard 4th to 9th.

Favourite sport

Swimming is my favorite sport. I just love swimming. Swimming is very unique and the best exercise for our whole body. Almost every part of our body is used in swimming. It cools down our body, mind and reduces stress. Two and the half hours of swimming per week can also reduce the risk of chronic illness. In competitive swimming there are four major styles. Butterfly, Backstroke, Breaststroke and Freestyle .These have been the same over last 30-40 years. I can swim in Breaststroke and I am looking forward to learn Freestyle. The best time to learn swimming is during the summer holidays, because the water isn't cold. Swimming in rainy or winter season is difficult if you are swimming in an outdoor pool. And if you are swimming in an indoor pool ,you can swim anytime. Swimming suits, cap and goggles are a must while swimming. Swimming without coach can become dangerous for new people. Swimming is the best tool to survive in an emergency. Floating on water is one of the best moment you can experience.

Shruti Sahare VII A

Sports and fitness is very important in our day to day life. Everyone likes to play different sport, like cricket, basketball, football and many more. But today I want to talk about the famous sport basketball, which I liked the most. It's an interesting game but too hard to play. But first let's go to the history of basketball. The history of basketball began with its invention in 1891 in Springfield, Massachusetts by Canadian physical education instructor James Naismith as a less injury prone sport than football. It become established fairly quickly becoming very popular in 20th century progressed, first in America and then through the world. After basketball become established in American colleges, the professional game followed; the American [NBA] national basketball association established in 1949 grew to a multibillion dollar enterprise by the end of the century, and basketball become an integral part of American culture. We have shared everything about basketballs history. Now it's time to know about day to day basketball. As everyone know that basketball is a team game. It is played between two teams. One team contains 5 – 12 players. The overall length of basketball court is 29m x 15m. The sport is played with a hard rubber ball. It is bounced every time also called [dribbling]. I started liking basketball approximately 8 months back. I felt it so exciting and interesting. This game keeps me healthy , active and energetic .I liked it very much

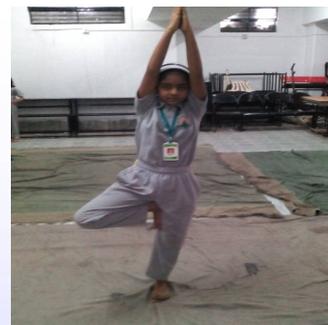

Aditya Dwivedi – VII A

INTERNATIONAL YOGA DAY

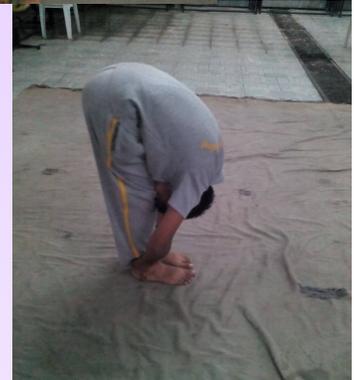

Every year in Northern hemisphere , the summer Solstice falls on 21st June .It is the day when Day is longest and the night is shortest. It is the day when Earth is at its closest distance from the Sun on its orbit. From the perspective of yoga , the Summer Solstice marks the transition of the Sun from Uttarayan to Dakshinayana, according to ancient Vedic calendar. According to Vedic Books , it was the day when Lord Shiva, first taught Yoga to his disciples. The knowledge of Yoga first descended from Shiva on this day. We can say, June21 as the Birthday of Yoga . This is the reason why several yogic Preachers had advocated celebrating June21 as The International Yoga Day.

United nations has passed a resolution declaring June 21 every year as the International Yoga day. Main aim of yoga is to utilize naturally available cosmic energy to unit the physical ,mental and spiritual aspect of human life with natural surrounding. Since the first indication of life is respiration/breathing for proper energies balance of all energies controlled over once breathing is essential. Thus, the first step in yoga is breath control through meditation and rhythmic chanting. Recognizing that sitting for a long periods in a meditation pose softens the muscles ,asanas were designed to by certain group of cells in the body which leads to prevention and recovery of specific diseases. This part of yoga became part of science of Ayurveda as return by Patanjali. It is repeatedly necessary to state that yoga is not a form of exercise as practiced in West. But a holistic way of living a balanced life in tune with nature. A life which does not dwell on unnecessary negative, unproductive thoughts and actions, but leads to a balanced ,calm, energetic and productive individual who is an asset to the society and nature.

Surya Namaskar also known as in English as Sun Salutation is a common sequence of asanas. Its origin lies in India where large population worships Surya (SUN). This sequence of movements and asanas can be practiced on different levels of awareness, ranging from that of physical exercise in various styles. The sun salutation is regularly practiced in our school during Yoga periods. In today's world children face a cut-throat competition and they should adopt Surya Namaskar in their daily schedule as it boosts endurance power and reduces the feeling of anxiety and restlessness, especially during exams. Regular practice of Surya Namaskar gives strength and helps to improve concentration. It is the best work-out for muscles and improves flexibility in spine and in limbs for future athletes.

World day against Child Labour

The world day against Child Labour, which is observed every year on June 12, is intended to foster the worldwide movement against child labour in any of its forms. The world day against Child Labour is an international organization sanctioned holiday first launched in 2002 aiming to raise awareness and activism to prevent child labor. According to data collected by UNICEF and ILO AN ESTIMATED 168 million children aged 5-17 worldwide were involved in child labor, this prevents children from getting education and it affects economical growth of country. Hence it is very necessary to put an end to this evil practice. The eradication of child labour will foster the development of all nations.

CHILD LABOUR! Do you know what is child labour? When children under 14 are forced to work then ,it is known as child labour. “it’s bad , it’s illegal” these are just words to say , but have you ever raised your voice when you have saw any child working? NO!, you would have not and this includes you also in child labour .

To foster the movement of world wide against child labour , International Labour Organization started World Day Against Child Labour. World day against child labour is celebrated on 12 June every year. Many events are organised by international labour organization [ILO]. ILO launched first World day against child labour in 2002 as a way to prevent child labour. World day against child labour to reliterate that every child has right to have quality education.

SAY NO! TO CHILD LABOUR AND SAY YES TO QUALITY EDUCATION!!!

It is indeed sad after 68 years of independence our country still suffering from various problems which are consequences of human greed and insensitivity. India faces the problem of child labour. everywhere we see kids at the traffic signals, sag pickers, tea stalls, roadside hotels serving food or tea coffee, etc. their insecure futures are seen. it would take a hundred years for India to root out child labour. several steps have been taken by the government of India to improve the condition of child. but still i get to read that children are working in construction site, sari factory, silk factory, cracker factory, manufacturing factory, etc. we as a part of the society should join hands with social workers and NGO’s to help them out.

Travel ogue

MY TRIP TO GOA

Our journey to Goa started at 6:00a.m. by car. My cousins, aunt, dad, grandmother and me were very excited . We drove through the lush green part of the Konkan .

We reached kolhapur and went to Mahalaxmi temple and had Devi Darshan. We had breakfast in Mcdonalds, and we reached Dudhsagar resort and stayed there for one night. I had lots of fun ,I went for swimming with my cousin sister. Then next day after breakfast we started for Goa , and in 2 hrs we reached our destination .First ,we went to the Church of Saint Fransis of Asisi and then to Basilica of BomJesus . Later we went to our hotel in Panjim, Ginger hotel. We drove to Kalangute beach . I did swim there for 2 hrs and in the evening we went to Donapaula around 8:00pm . On the third day we had great day at Saqulem beach . We had food in kammat hotel ,where I participated in a drawing competition where all the kids were provided with water colors and we had to draw on the road . I enjoyed the event very much. Day four started and we started our journey back home. Visiting Goa was a different experience altogether. It was great fun with all the family members together. Hope in future , my parents plan a trip where I get to see the different beautiful places in my own country India.

Abhay Musale VII A

AmAZing switzerl And

Switzerland is an amazing place like a heaven. It is specially famous for its chocolates & cheese. Me and my brother went there for two weeks with nearly 50 more children from India. We first went to Zermatt. Zermatt which is a hill station there are some amazing ski mountains to do ski. We also visited Alpine museum & a fun park. The next week we visited to place named Verbier. There we did different activities every day like paragliding, bridge swinging, rock climbing ,etc. We also visited chocolate and cheese factories. I'm never going to forget this experience throughout my life and if I get another chance to go there I will love to go.....

WORKSHOP FOR TEACHERS

AN OVERVIEW OF A WORKSHOP BY COUNSELLING DEPARTMENT IN JUNE 2015

Our school counselor took a workshop for the teachers in the month of June 2015 on the following topics -

1-Stress Management and Relaxation Techniques –

She explained the role of exercise in controlling stress . She also spoke about **Positive Mind Programming** or **Positive affirmations** and its role in uplifting a person's mood .The role of antioxidants was highlighted .Stress management is essential to increase the productivity of teachers and for overall development of teachers .A thirty minute session was taken for the teachers on **Vipassana Meditation**. Meditation increases concentration and reduces stress .This is a helpful tool not only for teachers but also for students. After doing meditation one experiences a positive attitude, more energy and harmony with one's environment .A relaxed mind leads to better output and performance in personal and professional life.

2- Class Control Techniques for all teachers -

She elaborated on the role of monitors and buddy system- where a weak student could be paired with an intelligent student .There is a need to keep the students busy and absorbed in various activities in order to have class control .

The following tips should also be employed by teachers for better class control–

- a) Be punctual to the class. b- Offer opportunities for responsibility. c- Be well organized.
- d-Show that you like children.

3- How to deal with Low IQ and Gifted children –

She spoke about the need of students to be appreciated and importance of sports in the academic life of students .The slow learners have to be given personal attention and hand holding is required .

The gifted child needs to be stimulated with various extra activities and questions so that in future they can be leaders in their field .

INTERNATIONAL MUSIC DAY

Music gives a soul to the Universe, wings to the mind, flight to the imagination and life to everything– Plato

June 21 has been designated as World Music Day, a day the world celebrates the magical gifts of music. Its origin lie in France when in 1976, American musician Joel Cohen, proposed all night music celebration to mark the beginning of summer solstice and since then it has become a worldwide phenomenon with over 32 countries having their own celebration in their own way, regardless of one season. This is a day to appreciate many benefits that music making brings to life. It spots lights the significance of music in our own cultures and salutes the many benefits that – both making it and enjoying it brings people together. Music has the power to heal, connect and inspire.

Sakshi Gupta VIII-A

In 1982 , Jack Lang and his staff at the ministry of culture, dreamed up an idea for a new kind of Musical holiday. They imagined a day where free music would be everywhere all around the city ,street corners, parks, roof tops , garden etc. The event would take place on the Summer Solstice, June 21 and would be called “Fete De Musique” which means Festival of Music. This day is declared as National Holiday in France. France shuts down on the Summer Solstice and musicians take over. Almost 5 million people celebrate this day by playing instruments or singing in public.

Shambhavi Shivam

Demonstration: fire extinguisher

A drill was conducted by the school which was a great experience for the students. We came to know about the various types of fire extinguishers. The three types which are used to extinguish fire are solid, liquid and gases . It was exciting to see how they used the fire extinguisher. Few of the students volunteered to use the extinguisher. They also told us that some precautions should be taken before using them. They should be used only emergencies. The smoke released on using the fire extinguishers is not harmful. So they gave us a small demonstration to. It was a very informative and important learning experience from which one can learn.

Devangi Bhamare

IX-B

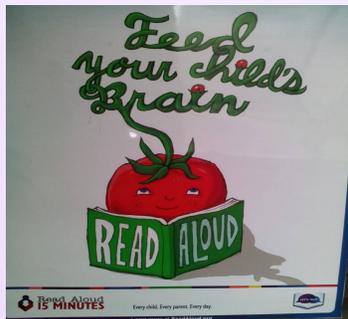

PRE-PRIMARY ACTIVITIES

Fathers Day Celebration

Father's Day is a celebration honouring and celebrating fatherhood. Many countries celebrate it on third Sunday of June. It is celebrated to recognise the contribution that fathers make to the lives of their children. It's a day of fatherhood and male parenting. Our Pre Primary section also celebrated Fathers Day with their tiny tots. The fathers were invited for "Biscuit Topping Activity". The children were excited to do this activity with their father. The fathers along with their children decorated the biscuits with different toppings like cheese; cut fruit pieces etc. There was a good co ordination seen between the father and the child. The children also learned about different shapes and how to arrange things in a decorative manner. The teachers prepared colourful greeting cards on behalf of the children to give to their fathers. All the children enjoyed this activity.

READ ALOUD

Our Pre Primary Section is introducing this activity of reading, where teachers on every Friday will read one story book loudly for them and then every child will be allotted one story book every Friday for one week which their parents/ grand parents or any elderly person will read for them at home. This will help the child in their listening skill and will also enhance their cognitive ability. This will develop a bonding between teacher and child, Parent/ Grand Parent and child.

REDUCE BAG WEIGHT

The prescribed weight of the bags for students of classes 1st to 8th is between 1800gms and 3425gms. Heavy school bags can lead to acute and chronic pain. One way to reduce the load would be to leave behind all material required for extra curricular activities like art and craft, GK, Computer etc. in the school itself. We at City International School Aundh are aware about the issue and hence conduct weekly exercises to weigh every student's school bag. The students and parents should also make sure that their ward carries books according to the time table given.

In this way together we can help in reducing the bag weight of every student.

Corn Day at School

One of the world's healthiest food is "Corn". To understand the importance of the corn and to see that every child eats corn our Pre-primary section celebrated corn day in school on 23rd July, 2015. As a part of the activity children were asked to bring boiled corn from home to be used for making "corn chat". All children of Pre-primary classes brought corn on that day. Few of them brought whole corn cob. Teacher asked them where they got the corn from. Then teacher explained them where corn is produced and what are its uses. Teacher also showed them a cob of the corn and explained them about different colors of the corn available in the market and how healthy it is to eat corn. The children were very excited to make corn chat. Teacher mixed everyone's corn in a big vessel and added chat masala in it. After mixing it well that corn chat was distributed to children. They learned about different tastes like sweet, salty. They had a great fun sharing and eating together.
